

Attorney Docket Number: 07072-948001  
Client Docket Number: EMC 03-090

### **ABSTRACT**

A method for storing data includes writing the data to a temporary storage location and buffering a mirror request to copy the data from the temporary storage location to a mirror. Once all the data is present, the validity of the data is determined. If the data is valid, the mirror request is executed. Otherwise, the mirror request is deleted.
